

Summer Care 12-0-0 with added iron

GUARANTEED ANALYSIS

Total Nitrogen (N)	12.00%
7.6% Soluble Nitrogen	
2.4% Insoluble Nitrogen	
Sulfur (S)	11.00%
Calcium (Ca)	8.60%
Iron (Fe)	1.00%

Derived from: Ammonium Sulfate, Milorganite, and Calcium Carbonate

CONDITIONS OF SALE

Seller warrants that the product conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of fitness for a particular purpose, expressed or implied, extends to the use of this product contrary to label instructions or under abnormal conditions, or under conditions not reasonably foreseeable to seller and buyer assumes the risk of any such use. Seller shall not be responsible for incidental or consequential damages, if any resulting from a breach of warranty.

GENERAL INFORMATION

Summer Care was formulated to produce a dark green color, reduce water use, and maintain turf health under the stress of summer heat. The low nitrogen formula combines the high-energy nitrogen of ammonium sulfate with the long-lasting nitrogen release of organic fertilizer to build roots and dark green color.

DIRECTIONS FOR USE

Home and Commercial Properties:

For best results apply 250 lbs./ acre or 6 lbs./1000 sq. ft. in early June. This will give the lawn time to take in the nutrients and build a larger root system.

General Campus and Athletic Turf:

Under high use or high wear conditions apply 250 lbs./acre to the general areas in early June. Athletic Fields in use apply 300 lbs./acre in early June. Athletic Fields that are out of use and resting apply 250 lbs./acre and repeat every 4-5 weeks if under irrigation to build roots.
