

## Lawn Starter/Builder 17-9-7 Homogenized Formula

### GARANTEED ANALYSIS

Total Nitrogen (N)	17.00%
Available Phosphate (P2O5)	9.00%
Soluble Potash (K2O)	7.00%
Calcium (Ca)	7.00%
Sulfur (S)	6.00%

Derived from: Ammonium Nitrate, Ammonium Sulfate, Ammonium Nitrogen, Potassium Sulfate, Calcium Carbonate, Phosphoric Acid, and Soft Rock Phosphate

### CONDITIONS OF SALE

Seller warrants that the product conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of fitness for a particular purpose, expressed or implied, extends to the use of this product contrary to label instructions or under abnormal conditions, or under conditions not reasonably foreseeable to seller and buyer assumes the risk of any such use. Seller shall not be responsible for incidental or consequential damages, if any resulting from a breach of warranty.

### GENERAL INFORMATION

The 17-9-7 Lawn Starter/Builder is a manufactured fertilizer using homogenizing technology. This process makes it possible to combine higher quality natural nutrients with conventional materials to create a natural slow-release fertilizer. This process also has a positive effect on the soil environment which most blended products cannot provide. Homogenizing allows us to add three forms of nitrogen and two sources of phosphorous to our product. Using these higher quality ingredients along with the homogenizing process makes it possible to reduce the salt and acid content in our fertilizer. This gives lawns a quicker green-up and a natural, longer-

lasting release. Lawn Starter/Builder will produce more uniform growth and a healthier, deeper root system.

### DIRECTIONS FOR USE

New Lawns:

Use 5-6 lbs./1000 sq. ft. or 250 lbs./acre once grass is up (approx. 2 weeks after seeding)

Home Lawn:

General maintenance: 220 lbs./acre or 5 lbs./1000 sq. ft. every six to eight weeks.

Quick damage repair: 7-8 lbs./1000 sq. ft. or 300-350 lbs./acre and reapply 6-7 lbs./1000 sq. ft. or 250-300 lbs./acre until damage is repaired.

Special Turf:

General campus: 220 lbs./acre or 5 lbs./1000 sq. ft. every six to eight weeks.

Stadium Fields:

High-Wear Turf: 250-300 lbs./acre or 6-7 lbs./1000 sq. ft. every four to five weeks.

Tee Box Maintenance:

Early season maintenance and green-up: 220-275 lbs./acre or 5-6 lbs./1000 sq. ft. right after spring thaw.

Mid season maintenance: 220 lbs./acre or 5 lbs./1000 sq. ft. every four to six weeks.
