

Revive™ 4-0-1

FERTILIZER

GUARANTEED ANALYSIS

Total Nitrogen (N) 4.00%

Soluble Potash (K₂O) 1.00%

Derived from:

Aqua Ammonia and Potassium Nitrate

Other Ingredients: Calcium Carbonate, Humic Acid

CONDITIONS OF SALE

Seller warrants that the product conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of fitness for a particular purpose, expressed or implied, extends to the use of this product contrary to label instructions or under abnormal conditions, or under conditions not reasonably foreseeable to seller and buyer assumes the risk of any such use. Seller shall not be responsible for incidental or consequential damages, if any resulting from a breach of warranty.

GENERAL INFORMATION

Revive is formulated to repair high traffic areas, salt damage caused by urine and ice removal, and to stimulate new growth in shady areas. Revive is a blend of plant and soil nutrients specifically designed to help replenish plant vigor and stimulate new growth. This unique formula combines nutrients and soil-bonding agents that enhance both root development and strong plant growth. It is safe for all plants.

DIRECTIONS FOR USE

Lawns:

Moisten soil before applying Revive. Apply one quart to 2500 sq. ft. and water in immediately for best results. You should start seeing visual changes in about two weeks. Revive may be reapplied to extremely damaged areas every 15 days as needed.

Trees, Shrubs, Flowers:

Moisten soil before applying Revive. Apply one quart to 2000 sq. ft. of soil around the base of the plant out past the drip line and water in immediately. If you are using a watering can for watering, mix 3-4 oz. of Revive in 5 gal. of water. This will treat a 10'x10' area.
