

#### ACTIVE INGREDIENT

bifenthrin

#### % ACTIVE INGREDIENT

7.9%

#### FORMULATION

liquid

#### CHEMICAL FAMILY

pyrethroid

#### EPA REGISTRATION #

228-458

#### BRAND ALTERNATIVE

Talstar®

#### MODE OF ACTION

sodium channel modulator

#### RESTRICTED USE

yes

#### SIGNAL WORD

caution

#### PACKAGING INFORMATION

4 x 1 gal

Menace® GC 7.9% contains bifenthrin, the active ingredient used in Talstar®.

**MENACE**® **GC 7.9%**  
FLOWABLE

## Wipe Out Pests with Menace® GC 7.9%

Damaging insects don't stand a chance against Menace® GC 7.9% insecticide. It starts working on contact to control insects and mites in both larval and adult stages, and Menace keeps pests down with proven residual control.

Menace GC 7.9% can be used in greenhouses and nurseries, as well as on golf courses and on ornamental and turf in landscaped areas around residential and commercial buildings, parks, recreational areas, golf courses, sod farms and athletic fields. The label also includes fire ant quarantine treatments and drench applications for soil incorporation in potting media.

## LABELED USES

Greenhouses and nurseries  
Golf courses  
Ornamental and turf in landscaped areas around residential, institutional, public, commercial and industrial buildings  
Parks  
Recreational areas  
Sod farms  
Athletic fields

## PESTS CONTROLLED

Adelgids	Imported fire ants
Annual bluegrass weevil (Hyperodes) adults	Japanese beetles (adults)
Ants	Lacebugs
Aphids	Leafhoppers
Armyworms	Leafminers
Bagworms	Leafrollers
Beet armyworm	Leaf feeding caterpillars
Blackvine weevil	Mealybugs
Bluegrass billbugs	Millipedes
Brown soft scale	Mites
Broad mites	Orchid weevil
Budworms	Pecan leaf scorch mite
California red scale (crawlers)	Pillbugs
Centipedes	Pine needle scales (crawlers)
Chinchbugs	Plant bugs (incl. Lygus spp.)
Citrus thrips	San Jose scales (crawlers)
Clover mites	Sod webworms
Crane flies	Sowbugs
Crickets	Spider mites
Cutworms	Spiders
Earwigs	Tent caterpillars
Elm leaf beetles	Thrips
European crane flies	Ticks
European red mite	Tip moths
Fall webworms	Twig borers
Flea beetles	Weevils
Fleas	Whiteflies
Fungus gnats	
Grasshoppers	

## Key Performance Benefits

Excellent control of insect and mite pests in both larval and adult stages

Low use rates with proven residual activity

Broad label allows for use in greenhouses and nurseries, golf courses and on ornamental and turf in landscaped areas around residential and commercial buildings, parks, recreation areas, sod farms and athletic fields

Odorless, non-staining formulation

Excellent tank-mix partner

## Application Recommendations

For grass areas, apply Menace as a surface or sub-surface treatment. Use application volumes of up to 10 gallons per 1,000 square feet for uniform coverage when treating dense and/or long grass foliage. For low volume applications, less than 2 gallons per 1,000 square feet, immediate irrigation of treated area with at least 0.25 inches of water following application to ensure efficacy of sub-surface pests such as mole crickets is recommended.

Do not apply more than 0.2 pound active ingredient per acre (40 fluid ounces) of Menace GC 7.9% in a single application or per year for outdoor applications.

Some insects are known to develop resistance to products used repeatedly for control. Practice good resistance management strategies when using this product.

**FOR SPECIFIC APPLICATION RATES, DIRECTIONS, MIXING INSTRUCTIONS AND PRECAUTIONS, READ THE PRODUCT LABEL.**
