Control Tough Weeds in Turf with Triple the Power

Triplet® SF is perfect for control of a broad-spectrum of hard-to-kill broadleaf weeds in turf such as dandelion, clover, henbit and plantains. A combination of three powerful selective herbicides, it’s ideal for both cool- and warm-season grasses. Plus, Triplet SF is labeled for use on sod farms.

KEY PERFORMANCE BENEFITS

- Labeled for sod farm usage
- Combination of three powerful selective herbicides
- Excellent control of a variety of broadleaf weeds
- Flexible application rates – higher rates for problem areas, lower rates for turf maintenance
- Ideal for cool- or warm-season turf
- Tank-mix compatible with most liquid fertilizers and iron*

*Compatibility test required

ACTIVE INGREDIENTS
2,4-D, mecoprop-p and dicamba

% ACTIVE INGREDIENTS
30.56%, 8.17% and 2.77%

FORMULATION
liquid

CHEMICAL FAMILY
phenoxyaliphatic and benzoic acids

GROUP NUMBER
4

EPA REGISTRATION #
228-312

RESTRICTED USE
no

SIGNAL WORD
danger

PACKAGING INFORMATION
2 x 2.5 gal
30 gal
**LABELED USES**

Ornamental turf lawns (residential, industrial and institutional)
- Parks
- Cemeteries
- Athletic fields
- Golf courses (fairways, aprons, tees and roughs)
- Sod farms
- Roadsides (including aprons and guardrails)
- Rights-of-way
- and other non-crop areas

**WEEDS CONTROLLED**
- Bedstraw
- Black medic
- Buckhorn
- Burdock
- Chicory
- Chickweed
- Clover
- Dandelion
- Dock
- Ground ivy
- Healall
- Henbit
- Knotweed
- Lambsquarters
- Lespedeza
- Mallow
- Morning glory
- Peppergrass
- Pigweed
- Plantain
- Poison ivy
- Poison oak
- Purslane
- Ragweed
- Sheep sorrel
- Shepherd’s-purse
- Speedwell
- Spurge
- Wild carrot
- Wild garlic
- Wild lettuce
- Wild onion
- Yarrow
- and other broadleaf weeds

<td>1.1 to 1.5</td>
<td>0.5 to 5</td>
<td>3 to 4</td>
<td>5 to 220</td>
</tr>
</tbody>
</table>

**Use Directions:**
- **For Professional Lawn Maintenance** – Higher water volumes may be used when tank-mixed with a turf fertilizer.
- Follow fertilizer labels for proper amounts to add. Use reduced rates if grass is stressed from heat or drought. Exercise care when applying during growth stages from dormancy to green-up and from green-up to dormancy. Some temporary discoloration may occur in warm season grasses.
- If Bermudagrass is dormant, up to 4 pints per acre may be used. However, some hybrid Bermudagrasses may be sensitive to this product. Contact your local extension service weed control specialist.

</thead>
<tbody>
<tr>
<td>Bentgrass (Putting and Bowling Greens)</td>
<td>0.67</td>
<td>3.3</td>
<td>1.8</td>
<td>145</td>
</tr>
</tbody>
</table>

**Use Directions:** Apply on closely mowed Bentgrass, preferably in May or mid-August through September. Slight turf yellowing will disappear after about one week. On closely mowed golf course fairways and tees or bowling greens - apply when weeds are actively growing and temperatures are low. Exercise care to avoid over application to prevent injury. Temporary discoloration may occur.

**NON-TURF AREAS**

Roadsides (including aprons and guardrails), rights-of-way and other similar non-crop areas:

For control of broadleaf weeds, mix at a rate of 1.5 to 3.5 quarts of this product per acre in enough water to wet all parts of the foliage. This may require 50 to 300 gallons of water per acre. This mixture will cover 43,560 square feet. Thoroughly saturate all weeds with spray mixture. Apply any time between the time when plants come into full leaf (spring) to when the plants begin to go dormant. Best results are obtained when weeds are young and actively growing. Do not cut weeds until herbicide has translocated throughout the plant causing root death.

For control of woody plants, apply to both stems and foliage any time from the time foliage is completely matured until the time plants start to go dormant. All leaves, stems and suckers must be completely wet to the ground line for effective control. Regrowth may be anticipated on the more resistant species.

**Woody Brush:** Add 1 to 1.5 gallons of this product per acre to wet all parts of the brush foliage, stem and bark. This may require up to 200 to 600 gallons of water per 43,560 square feet depending upon the height and thickness of the brush. Mix thoroughly before spraying.
