

Pell Lime

FERTILIZER

GUARANTEED ANALYSIS

Calcium (Ca) 38.00%

Magnesium (Mg) 0.50%

Derived from:

Calcium Carbonate

CONDITIONS OF SALE

Seller warrants that the product conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of fitness for a particular purpose, expressed or implied, extends to the use of this product contrary to label instructions or under abnormal conditions, or under conditions not reasonably foreseeable to seller and buyer assumes the risk of any such use. Seller shall not be responsible for incidental or consequential damages, if any resulting from a breach of warranty.

GENERAL INFORMATION

Pell Lime is our own unique formulation that uses only high quality materials. Our calcium carbonate forms are 0.90 % magnesium or less. Pell Lime will aid in maintaining the correct calcium level and provide an increased uniformity over other formulas. GreenGuard Pell Lime promotes even growth and provides better quality turf.

DIRECTIONS FOR USE

Pell Lime is designed to work in the soil and will work faster when incorporated. If Pell Lime is used to reclaim pond soil or sub-soil we recommend using Specialty Turf & Ag Consulting to test soil prior to starting any project to identify nutrient needs or problems.

Home Garden Use:

For best results apply 500 lbs./acre or 12 lbs./1000 sq. ft.

New Seed Bed Applications:

Apply 500 lbs./acre or 12 lbs./1000 sq. ft. to seed bed before harrowing or Harley raking.

Sports Fields and Golf Courses:

For sand-based sports fields, golf greens, and tee boxes incorporate 500-800 lbs./acre (call for recommendations).

Sod Establishing:

Apply 500 lbs./acre or 12 lbs./1000 sq. ft. to the soil before the laying sod.

Native Seed Beds:

Apply 500-1000 lbs./acre and incorporate before planting.
